Education

5/16-9/16: LEARN Academy

- attended the Web Development intensive bootcamp; a full-time, 4 month program

2002-2007: James Madison University

- B.A. in Mathematics
- minors in Spanish and Music

Technical Skills

languages: Ruby, Javascript, Python and Fortran

frameworks and libraries: Rails, jQuery and Bootstrap

database: PostgreSQL, MySQL

additional skills: HTML, CSS, RSpec, Github, pair programming and Behavior Driven Development

Technical Experience

2016-present: intern with Bandsintown, LLC

- working with Ruby on Rails to update various back-end components of legacy software as part of a larger effort to prepare for a major software upgrade

2001-2005: worked for HORTICOPIA, Inc., a company that produces software for the horticulture industry

- created the online help for the software
- ran the technical support department helping clients authorize the software and troubleshoot problems
- worked with Dreamweaver to manage the HORTICOPIA website

Projects

Conway's Game of Life Simulator

- used Javascript and jQuery to construct an app that models John Conway's Game of Life by allowing users to set an initial condition and cycle through stages of life

Flack Messaging App

- used Ruby on Rails with PostgreSQL to construct a forum-type app which allows users to register, log in and leave messages for each other in a forum-type view

Food Truck Tracker

- used Ruby on Rails to collaborate with a group and develop a food truck tracking app where food truck owners can register a truck and let other foodies find their locations and times on a google map

Other Experience

2016: worked as a volunteer during Startup Week San Diego

2009-2015: worked as a barista in various cafes in Philadelphia.

From 2011 on, joined Elixr Coffee as a barista in it's infancy and oversaw a period of growth that saw the business triple in size and become one of the biggest specialty coffee roasters in Philadelphia.

2008-2009: created own company and worked as a freelance piano technician
